

FAA Safety Team FAASTeam | Safer Skies Through Education

It is that time, once again, to start getting excited about all the activities, seminars, workshops, and forums at Sun 'n Fun! This year's event is shaping up to be one of the biggest and best ever. The FAA Safety Program is joining with all the other event organizers to bring the very best safety information to all attendees. We will also be providing Webinar versions of many of our seminars during the week for those that just can't join us live. Click on this url: <http://qrs.ly/zo2p30p> to see the latest FAA Safety Seminars & Workshops schedule. As you can see it will be an excellent time for pilots and AMTs alike to catch up on the latest safety information.

New to our schedule this year; Sunday is our "Especially for the Public" day in the FAA Forums where we have two special topics for all attendees at Sun 'n Fun. One will provide great information on FAA Careers. Next, **Southwest Airlines** has joined us to speak about "**Passenger Safety**" on commercial airlines. Both these seminars should pack the house with interested family and friends to close out our great week of Sun 'n Fun.

We would greatly appreciate anything you can do to help get the word out about these great seminars held in the FAA Safety Team building in the center of the Sun 'n Fun campus. We would be happy to provide you with a special copy of our schedule that will have your very own URL and QR codes on them so we can track, for you, just how many people download the event schedule from your publicity efforts and publications. All you need to do is give me a call or reply to this email with your complete contact information and where you plan on using the information. I will quickly provide you with a commercial print quality PDF. At the very least we would appreciate any efforts you make to include the FAA Safety Forums in any of your planned publicity for Sun 'n Fun.

If you have any questions or would like to discuss anything about the safety seminars please contact me at one of the provided methods below.

Thanks again, and I look forward to meeting each of you at this year's event. Please stop by the FAA Forums building and say hello.
